# 1 – INTRODUCTION

London Forex Open is a 100% mechanical Forex Trading System based on the well-known and respected Asian market range principle.

The London Forex Open breakout strategy is a simple trading strategy designed to capture moves that occur within the first two hours of the London trading session.

The Asian session is typically range bound in many of the major currency pairs due to low volume. This frequently leads to price breakouts when the volume increase at the opening of the London financial market.

The strategy identifies price trends that may have the potential to offer session price breakouts when the London market opens.

The strategy is designed to be simple to understand unlike many trading systems, it is easy to execute and needs little in the way of time commitment.

## 2 – RETURNS

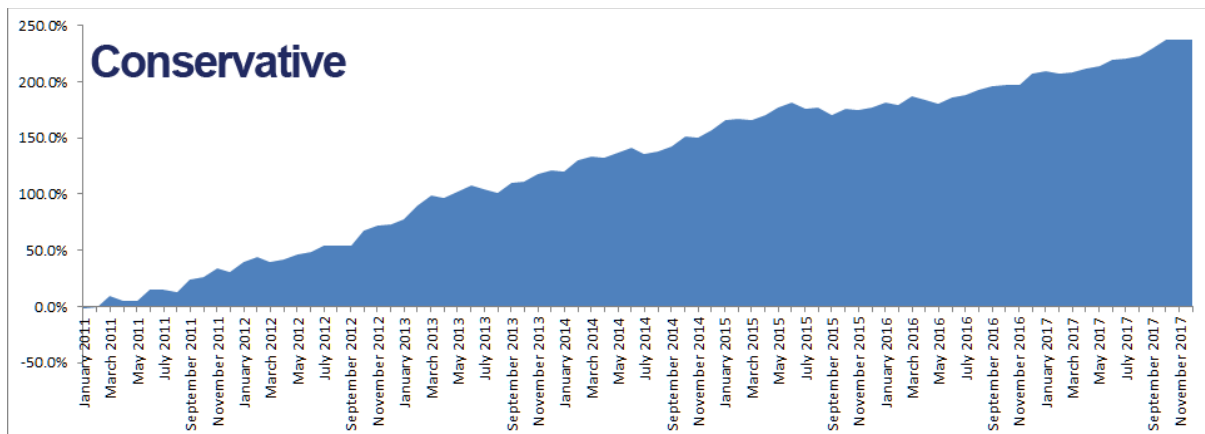

The following charts show the assumed growth from performance on the GBP/USD currency pair over a seven-year period.

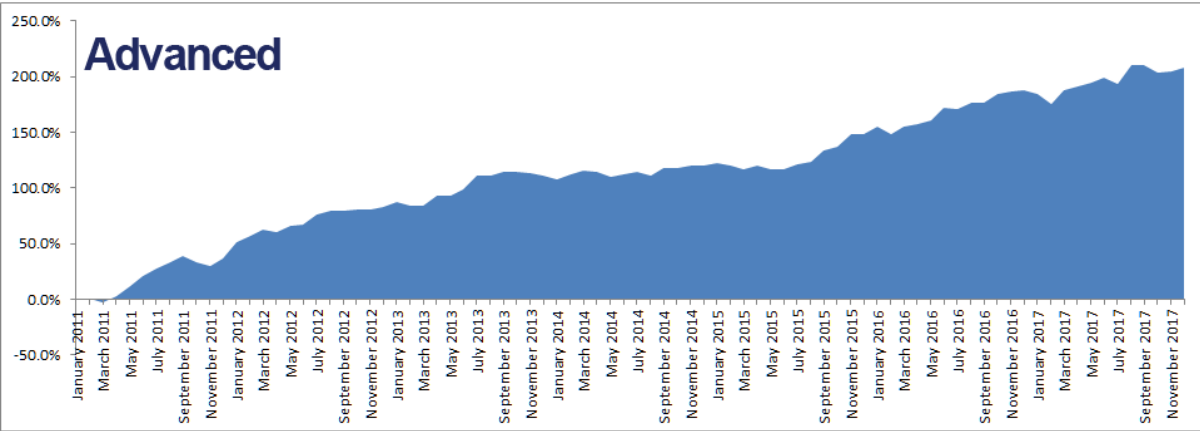

Performance is broken down for each strategy, with a chart showing combined performance across all strategies provides.

The risk model used is based upon 3% risked per trade.

We provide a Monthly breakdown of historical results going back to the strategies initial publication. To access them [click here](#).

A full breakdown of our performance is also provided at the end of each month on our [Tumblr blog](#).

# LEGAL & RISK DISCLAIMER

Trading any financial market involves a high level of risk and may not be suitable for everyone. Prior to trading you should carefully consider your investment objectives, level of experience and personal risk appetite. You should only trade with money you can afford to lose and accept that you could lose more than your initial deposit. You should fully understand the risks involved in any form of trading and be willing to accept them.
